UNIVERSITY of **HOUSTON**
DEPARTMENT OF COMPUTER SCIENCE

Friends of University of Houston Computer Science Program

The Friends of UH Computer Science Program is a partnership program between the university and corporations. The program is designed to meet the needs of industry and give companies the opportunity to have a greater impact in the development of computer science work force. Corporate members of this program will have greater access to students, faculty resources and increased visibility within the university community. The UH Department of Computer Science is internationally recognized for its research in biomedical informatics, cyber-physical systems, data analytics, high performance computing, gaming, graphics, security and visualization. Graduates from the UHCS program are employed in industries across the economic spectrum, including technology, energy, health, and finance.
