

Additional One-Time SFAC Request
FY 27 One-Time Request (f) Know the Code

Dean of Students Office

Know the Code Campaign to assist in harm reduction practices supporting student success.

DOS will continue to focus on innovative programming that aligns with harm reduction practices, specifically in the areas of alcohol, drugs, and hazing. This is achieved through efforts like our annual pep rally, which concludes with a keynote speaker focusing on safe and healthy tailgating practices. We plan to replicate this event with an emphasis on preventing mistreatment of new members within student organizations and other student groups impacted by hazing.

Our campaign also extends into residence halls, providing residential students with an additional layer of education and support from the Dean of Students Office. By proactively addressing risk behaviors and promoting a culture of safety, respect, and accountability, these initiatives help students make informed choices, develop leadership skills, and foster positive peer interactions. Ultimately, this contributes to overall student success by supporting their well-being, enhancing engagement, and creating a safe and supportive environment conducive to academic and personal growth.
