

Commuter Services Programing

FY27 One-Time (g)

Goal: Student leaders who host events, manage social media campaigns, represent DOS at resource fairs, and collaborate with departments and student organizations to engage and support commuter students. Also, to provide programming and engagement opportunities for commuter students, strengthening their sense of belonging at UH.

Student leaders play a critical role in supporting commuter students by hosting events, managing social media campaigns, representing DOS at resource fairs, and collaborating with departments and student organizations. Their work provides programming and engagement opportunities that help commuter students feel connected to the UH community, despite not living on campus.

By offering targeted resources and programs, these initiatives ensure that commuter students have access to the same support, opportunities, and sense of belonging as residential students. Research shows that students who feel connected to their campus community are more likely to engage academically and socially, persist through challenges, and achieve overall success. Strengthening commuter student engagement not only enhances their individual experience but also contributes to a more inclusive, vibrant, and cohesive UH community.

Funding Request: \$5,000 for food, marketing, programming, and retreats.
